
MF52C NTC

Description

Product features:

- High-precision temperature measurement for accurate sensing
- Compact, space-saving design with rapid thermal response
- Reliable long-term stability for consistent performance
- Strong interchangeability with uniform product consistency
- Cost-efficient manufacturing enabled by large-scale production

Product applications:

? Air conditioning equipment.

? Heating equipment.

? Electronic thermometer.

? Liquid level sensor.

? Vehicle electronics.

? Electronic desk calendar.

? Cell phone battery.
